

MAINE LEAD SERVICE LINE INVENTORY SURVEY

This Survey was created to generate an initial approximation of the number of lead service lines in the State of Maine. Because of this, we are required to track service line materials for both the utility and the customer-owned portions of each service line in our system, and supporting data for how the inventory was developed.

All water systems must submit their initial inventories to the State of Maine by **October 16, 2024**. We have started reaching out to our customers and are making appointments to visually inspect service lines where they come into homes. If you have not heard from us, please give us a call at 207-668-7686 or email us a picture at judwasl@gmail.com.
